Copy of remarks

"We visited the hospital to-day (14th Vrischigam 1116) at 10 a.m. and went round. It seems that a covered passage to connect the new building with the central block is necessary. Now that there is no passage except the operation theatre, between the central block and the western block a passage may be provided, connecting the southern ends of both the blocks. We are glad that the premises are kept clean and tidy."
